Career Objective

Proactive Computer Science (**AI ML**) undergraduate with strong problem-solving skills and hands-on experience in **front-end development** and software projects. Proficient in **Data Structures and Algorithms** using C++ and JavaScript-based application logic. Seeking a Software Developer Intern role at IBM to contribute to scalable software solutions and collaborative development teams.

Education

GMRIT Rajam

Aug 2023 – Present

BTech in CSE(AI&ML) | GPA: 9.1/10.0

- **Coursework:** Data Structures and Algorithms, Software Engineering, Database Management Systems, Basics of Machine Learning.

Projects

Spotify Clone (Frontend)

- Designed and developed a responsive Spotify-inspired user interface focusing on layout consistency and usability.
- Implemented 100% responsive layouts using Flexbox and CSS Grid, ensuring compatibility across various screen sizes.
- Improved styling efficiency by reducing redundant CSS by 30% through modular class design.
- **Tech Stacks:** HTML5, CSS3

Simon Says Game

- Developed an interactive browser-based Simon Says game implementing 4+ difficulty levels with dynamic sequence generation.
- Provided visual feedback and level progression to enhance user engagement.
- Structured logic to handle 10+ user interactions per game session without page reloads.
- **Tech Stacks:** HTML5, CSS3, JavaScript

Academic Project

Detection of Scam Calls Using NLP — Survey Study

2025

- Reviewed and analyzed 10+ research papers on NLP-based scam call and fraud detection techniques.
- Studied key NLP preprocessing techniques including tokenization, normalization, and vectorization.

Technical Skills

Languages: C++, C, Python

Web Technologies: HTML5, CSS3, JavaScript

Database: SQL (Oracle)

Tools: Git, GitHub, Visual Studio Code

Certifications

Front-End Web Development Bootcamp (L&T EduTech)

2025

- Completed structured hands-on training in **HTML**, **CSS**, and **JavaScript** with practical UI-focused assignments.
